SST Solve-A-Problem – Junior

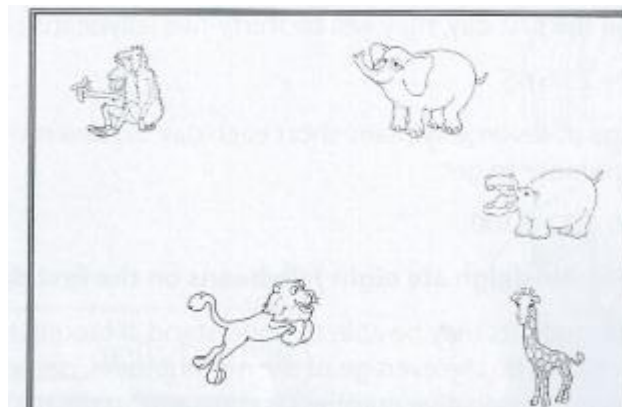

How many minutes in an hour??

How many minutes in half an hour ??

SST Solve-A-Problem – All

A small zoo has enough fencing to surround five animals but not enough to separate them. However by digging three straight trenches,(drawing three straight lines on the diagram below) the animals can be separated from each other. The animals cannot move from their places below. Where could the trenches (lines) be placed ???

SST SOLVE A PROBLEM -CHALLENGE

Just A Symbol

What maths symbol can be placed between two and three to make a number greater than two but less than three ???
