SST Solve-A-Problem – Junior

Kelly likes looking for insects in the garden. These are all the insects that she saw one afternoon. Can you help her display them so that she can tell her friends what she saw in the garden?

SST Solve-A-Problem – All

Freddo has had a nice swim in the bottom of the well and decides that now is the time to get out. Freddo climbs 3m up the wall of the well and then rests. But the wall is slippery and he then slips down 1m. He is so tired he goes to sleep for the rest of the day. The next day he does the same thing. He climbs up 3m, slips back 1m, and goes to sleep. In fact he does this every day until he gets out of the well.

Now the well is 13m deep. How long does it take Freddo to climb out of the well?

SST SOLVE A PROBLEM – CHALLENGE

In a class in the school down the road, everyone plays tennis or golf or both. In fact 80% play tennis and 70% play golf. What percentage plays both games?
