SST Solve-A-Problem – Junior

How many months in a year ??

How many weeks in a year ??

SST Solve-A-Problem – All

Some sheep stealers made off with half of a farmer's flock.

The following day they stole half of what they had left the day before.

This left the farmer with 16 sheep.

How many sheep did the farmer have to start with ?????

SST SOLVE A PROBLEM -CHALLENGE

Filling the Bath

When the taps on a bath are fully turned on, the hot tap can fill the bath in twelve minutes and the cold tap can fill it in four minutes. If both taps were turned on together, what is the shortest length of time it would take to fill the bath?
